

Layer Mask Exercise

Open the Lake image and choose File>Save as ... a Photoshop .psd file.

Move each image into the new file starting with the fish, then the bird, and finally the fisherman.

Use the layer masking techniques you have just learnt to mask parts of each included image.

Use the blending mode on each layer to edit the way the image appears.

- Fisherman: Fisherman - overlay, opacity: 100%,
graduated mask
- Bird: Bird - Hardlight, opacity 10%
- Fish: Fish - Soft Light, opacity 45%, X pres.
transparency
- Background: Lake image
